

CELSIUS TEMPERATURE DISPLAY (G1)

The Thermal Edge G1 option programs the unit to display temperature readings in Celsius (°C), providing an ideal solution for international applications, laboratory environments, or any setting where metric temperature measurement is preferred.

CUSTOM TEMPERATURE PROGRAMMING (G2)

The G2 option allows for factory-programmed customization of key operational parameters to meet your specific application requirements. Configurable settings may include temperature set point, hysteresis, time delay, and more. All G2 custom programming requests are subject to technical review and approval by Engineering.

Contact your sales representative for details and to submit application requirements for review.
